§ 319.56-46

States from Kenya only under the following conditions and in accordance with all other applicable provisions of this subpart:

- (a) The peas must be shelled from the pod.
- (b) The peas must be washed in disinfectant water at 3 to 5 °C containing 50 ppm chlorine.
- (c) Each shipment of peas must be accompanied by a phytosanitary certificate of inspection issued by the national plant protection organization of Kenya bearing the following additional declaration: "These peas have been shelled and washed in accordance with 7 CFR 319.56-45 and have been inspected and found free of pests."

(Approved by the Office of Management and Budget under control number 0579–0302)

§319.56-46 Mangoes from India.

Mangoes (Mangifera indica) may be imported into the continental United States from India only under the following conditions:

- (a) The mangoes must be treated in India with irradiation for plant pests of the class Insecta, except pupae and adults of the order Lepidoptera in accordance with part 305 of this chapter.
- (b) The risks presented by *Cytosphaera mangiferae* and *Macrophoma mangiferae* must be addressed in one of the following ways:
- (1) The mangoes are treated with a broad-spectrum post-harvest fungicidal dip: or
- (2) The orchard of origin is inspected prior to the beginning of harvest as determined by the mutual agreement between APHIS and the national plant protection organization (NPPO) of India and the orchard is found free of Cytosphaera mangiferae and Macrophoma mangiferae: or
- (3) The orchard of origin is treated with a broad-spectrum fungicide during the growing season and is inspected prior to the beginning of harvest as determined by the mutual agreement between APHIS and the NPPO of India and the fruit found free of Cytosphaera mangiferae and Macrophoma mangiferae.
- (c) Each consignment of mangoes must be inspected jointly by APHIS and the NPPO of India as part of the required preclearance inspection activities at a time and in a manner de-

termined by mutual agreement between APHIS and the NPPO of India.

- (d) The risks presented by Cytosphaera mangiferae, Macrophoma mangiferae, and Xanthomonas campestris pv. mangiferaeindicae must be addressed by inspection during preclearance activities.
- (e) Each consignment of fruit must be inspected jointly by APHIS and the NPPO of India and accompanied by a phytosanitary certificate issued by the NPPO of India certifying that the fruit received the required irradiation treatment. The phytosanitary certificate must also bear two additional declarations confirming that:
- (1) The mangoes were subjected to one of the pre- or post-harvest mitigation options described in \$319.56-46(b) and
- (2) The mangoes were inspected during preclearance activities and found free of *Cytosphaera mangiferae*, *Macrophoma mangiferae*, and *Xanthomonas campestris* pv. mangiferaeindicae.
- (f) The mangoes may be imported in commercial consignments only.

§319.56–47 Certain fruits from Thailand.

Litchi (Litchi chinensis), longan (Dimocarpus longan), mango (Mangifera indica), mangosteen (Garcinia mangoestana L.), pineapple (Ananas comosus), and rambutan (Nephelium lappaceum L.) may be imported into the United States from Thailand only under the following conditions:

- (a) Growing conditions. Litchi, longan, mango, mangosteen, pineapple, and rambutan must be grown in a production area that is registered with and monitored by the national plant protection organization of Thailand.
- (b) Treatment. Litchi, longan, mango, mangosteen, pineapple, and rambutan must be treated for plant pests of the class Insecta, except pupae and adults of the order Lepidoptera, with irradiation in accordance with part 305 of this chapter. Treatment must be conducted in Thailand prior to importation of the fruits into the United States.
